

AMENDMENT TO THE SPECIFICATION

On page 6, lines 1-6:

South Dakota. The remainder of the *E. coli* strains were obtained from the E. coli Reference Center, Pennsylvania State University, University Park, Pennsylvania. All of the *E. coli* strains are maintained at the E. coli Reference Center in Pennsylvania. The *Cl. perfringens* Type C, is a strain identified as having genotype C, and is an alpha and beta toxin producer, strain GL47, having ATCC accession no. [[_____]PTA-3000. It was isolated from a field case by Grand Laboratories, Inc. and is maintained at Grand Laboratories, Larchwood, Iowa.

On page 8, lines 1-11:

Combinable with an oil based adjuvant. However, one skilled in the art can readily obtain other appropriate strains from suitable depositories, academic or commercial sources. The necessary deposits have been made under the Budapest Treaty and in accordance with MPEP § 608.01(p) and 37 C.F.R. §§ 1.801-1.809, with the American Type Culture Collection, 10801 University Blvd., Manassas[[s]], Va, 20110-2209 and assigned ATCC accession number[[s ____]]PTA-3000. All restrictions on the availability to the public of the deposited material identified herein will be irrevocably removed upon the grant of a patent on this application, the culture(s) will be maintained for a period of 30 years from the deposit date, or at least five years after the most recent request for a sample, whichever is longer; and the deposit will be replaced if viable samples cannot be dispensed by the depository.
